YANA SOURCING

Couplings RFQ Checklist

Shaft couplings for torque transmission, alignment accommodation and vibration damping.

Type Rigid, jaw, disc, bellows, gear, Oldham or torque limiting

_____

Torque Continuous and peak torque, with duty cycle

_____

Speed Operating speed and balance requirement

_____

Bores Both shaft diameters, fits, keyways and retention method

_____

Misalignment Angular, parallel and axial limits under combined loading

_____

Construction Hub material and flexible element specification

_____

Order requirements Quantity, delivery destination, target date, drawing revision and acceptance documentation.
