YANA SOURCING

Hydraulic Pumps

RFQ Specification Checklist

Pump type
Gear, vane, axial piston or radial piston

Displacement and control
Displacement per revolution, fixed or variable, and control option

Pressure duty
Continuous and intermittent limits at the required operating points

Flow and speed
Required flow, input speed, rotation and duty cycle

Suction and drain
Inlet conditions, port orientation and case drain requirements

Mounting
Flange, pilot, shaft, spline or key dimensions

Fluid and evidence
Fluid, viscosity and temperature range; applicable performance reports

Order requirements
Sample quantity, repeat volume, destination and target date
