YANA SOURCING

# Fiber Laser Protective Windows

## RFQ Specification Checklist

Complete from equipment documentation or a drawing. Confirm requirements with the supplier.

**Equipment and part identity**
Head manufacturer, model, revision, window position, OEM part number or drawing revision.

**Dimensions and mounting**
Diameter, thickness, tolerances and edge details.

**Substrate and coating**
Material grade, operating wavelength, coating type and coated faces.

**Optical and surface requirements**
Transmission or reflectance limits, measurement conditions, surface quality and cleanliness.

**Damage threshold, if required**
Specify the required test method and reporting conditions.

**Packaging and quality records**
Individual packaging, lot identification, sample inspection and test report coverage.

**Order requirements**
Sample and order quantities, recurring volume, destination market and target date.

Product specifications and suitability are confirmed by part and supplier.
