YANA SOURCING

Servo Motors

RFQ Specification Checklist

Motor and drive
Motor type, drive model and power supply

Torque and speed
Continuous and peak requirements at relevant operating points

Duty and cooling
Cycle profile, ambient conditions and cooling arrangement

Feedback
Encoder type, resolution, interface and connector

Mechanical fit
Flange, shaft, keyway and permissible loads

Accessories
Brake, cables, connectors and protection rating

Acceptance evidence
Torque-speed curve, thermal limits and agreed sample tests

Order requirements
Sample quantity, repeat volume, destination and target date
